

How to upload a Blofeld soundset ?

- Connect Blofeld to your computer using USB, preferably without using any USB hub.
- Unzip the soundset to a folder of your choice.
- Download and install Spectre:

<http://www.waldorf-music.info/downloads-blofeld-en/spectre-downloads-en>

- Launch Spectre
- Make sure Blofeld is selected as MIDI output in Spectre
- Click the “Upgrade” button
- Select the MIDI file from the soundset. You can choose the bank it overwrites by selecting the appropriate file.

The soundset should now be transferred to Blofeld. In case your soundset includes samples, please perform these additional steps:

- Load the respective WPC file into Spectre, simply drag&drop to the Programs panel.
- Hit “Transmit” and have a coffee, transmission might take some time

Piece of cake. If for some reason this is not working for you, please don't hesitate and contact support@waldorfmusic.de
